PROFESSIONAL SUMMARY

Backend Engineer with 3+ years building production-critical systems in fintech, telecom, and enterprise ERP. Delivered caching library at 10K+ TPS, VoIP platform handling 1.5M+ calls/month, and currently building microservices for a large-scale POS/ERP product. Strong in Java, event-driven architecture, and cloud-native deployment.

TECHNICAL SKILLS

Backend & Core: Java (Advanced/Proficient), Spring Boot, Spring Data JPA, Spring Security, Quarkus, Hibernate, REST APIs, Microservices
Database & Messaging: MySQL, PostgreSQL, MongoDB, Apache Kafka, Redis, MinIO, GraphQL, Event-Driven Design, Transaction Management
Cloud & DevOps: AWS (EC2, RDS, S3, Auto Scaling), Docker, Terraform, Jenkins CI/CD, GitHub Actions, Linux Server Administration
Architecture & Design: System Design, OOP Design Patterns, Performance Optimization, API Design
Performance & Concurrency: Chronicle Queue, In-Memory Systems, WAL, Batch Processing, Multi-threading
Additional: C/C++, JavaScript, Git, Maven, SQL Optimization

WORK EXPERIENCE

Software Engineer, ODCL

March 2025 – Present

Dhaka, Bangladesh

POS/ERP Platform: Enterprise-grade ERP/POS system on microservice architecture

- Built core microservices and GraphQL/REST APIs for a large-scale ERP/POS platform with clean service boundaries
- Introduced MinIO as self-hosted S3-compatible object storage with pre-signed URL access, eliminating third-party cloud dependency
- Deployed microservices to Linux production servers using Docker and Terraform; used Kafka for async inter-service events
- Mentored new team members and conducted code reviews, improving team velocity and code quality
- Stack:** Java, Spring Boot, GraphQL, PostgreSQL, Kafka, MinIO, Docker, Terraform, Linux

Software Engineer, Telcobright

May 2023 – February 2025

Dhaka, Bangladesh

MemLedger: In-memory cache library with crash-resilient persistency

- Architected caching library with Write-Ahead Log achieving **10,000+ TPS** with zero data loss across 50K+ daily financial transactions
- Built atomic multi-database transaction system and async WAL consumer achieving **30-40x** performance improvement
- Stack:** Java 21, Quarkus, Chronicle Queue, MySQL, HikariCP

RTC Manager: Real-time VoIP billing platform — **1.5M+** calls/month, 99.9% uptime

- Built JWT auth, REST APIs, and smart billing engine with real-time balance validation and fractional refunds
- Designed event-driven architecture using Kafka for call event persistence and automated CDR generation
- Stack:** Spring Boot, FreeSWITCH, Java ESL, Kafka, MySQL, Docker

CDR Analyser (CAS): Processed **20M+** daily records with 100% billing accuracy across partitioned MySQL databases

- Stack:** C#, .NET, MySQL

EDUCATION

Chittagong University of Engineering & Technology (CUET)

Bachelor of Science in Computer Science & Engineering, CGPA: 3.24/4.00

Chattogram, Bangladesh

2017 – 2022

ADDITIONAL INFORMATION

Publications: 2 peer-reviewed papers — Heliyon (Elsevier Q1, 2024) and ACL Workshop (2022)

Problem Solving: 600+ problems — LeetCode (300+), Codeforces (265+), HackerRank (55+)
